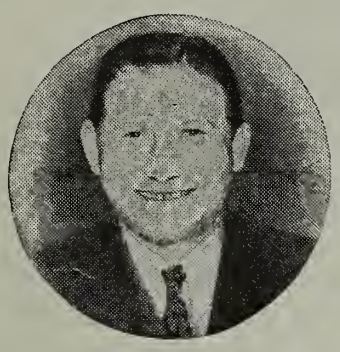
"The Coin Machines Merry-Go-Round"

By Bill Gersh



TEAMWORK

One of the most long sought for events by all industry is a return to normalcy. The average business man seeks greater freedom of movement. He wants to again be able to risk finances, set his own prices, and conduct his business without interference, provided of course, that he continues to obey the laws of the land. This is what all trade hopes for with the end of the war.

Contrary to the statements of blue-nosed crusaders, publicity seeking politicos, and certain others - the average man in this industry is no different from any man in any business. He strives for financial independence, especially for his later years. He tries to raise his children to become honored and respected citizens. He likes home life. He enjoys entertaining. Like all others, he desires the respect of his community. In general, he conducts himself as a patriotic and upstanding citizen should.

At the same time there is much of the adventurous and pioneer spirit in the average coinman. This is what probably caused him to enter into this industry. He must be a fighter, naturally, to continue on ahead in this business. He is a liberal. He is also ready to show that his trade is truly American in character and purpose. And it is. It is one of those unfathomable peculiarities of the American public to adore novel entertainment. His division of America's great entertainment industry has won international fame for the novelty of its entertainment. That's why there are now so many millions of dollars invested in this industry.

The average man in this business is not an "unscrupulous racketeer". This is but the sort of phrase that can be expected from publicity seeking politicians, circulation seeking newspapers and glory seeking crusaders. They foster such notoriety for their own small and mean advantage, not for the good of their communities nor for the welfare of the nation generally. There can't be, and there isn't, any quibbling on this score.

More than anything else, therefore, this man, this exponent of a new and novel entertainment means, seeks a return to normalcy and greater liberality. He seeks that return because he realizes it is his opportunity for true progress, true growth, and the chance to prove to his community, as well as to the nation at large, that he has a new kind of relaxing diversion, a more efficient and better merchandising service - that tho as yet groping about like an infant - is bound to eventually find itself and obtain the recognition it so assuredly deserves. Thereby bring more honor, more business and more good will to this country.

In a return to normalcy, the outstanding lesson learned from this tragic war, that only by a united front, by teamwork, were the peace loving nations of the world able to overcome an ogre of hatred and evil domination. In the post-war period this same fact is bound to influence the peace. Then surely a united front, created by teamwork, is bound to arise in this industry. And this is an industry that sorely needs such a front for its future welfare. In fact, for its very self preservation.

To what avail is it to look at such cities as New York, Chicago, Detroit, Cleveland, Milwaukee, and so many, many others, and find them destitute of even so simple an amusement as a pin game? Only one state in this great union legally recognizes the slot machine, as such. And yet there is creeping, higher taxation on coin operated equipment everywhere in the nation. Does it then avail anyone to attempt to hold back action for the necessary teamwork to create a united front for this industry?

In this long hoped for return to normalcy, a great many new ideas will be born. The returning serviceman who will enter into this industry, will only be able to do so because of the fact that teamwork saved his life and brought him back. The advantages of teamwork were drilled deep inside him. The pilot that flies out to meet the enemy feels safer because of his companions flying alongside his wings. The giant bomber that laid waste to so many great cities only continued on successfully because overhead was a cover of speedy, fighter planes....teamwork incarnate.

Teamwork all the time, everytime. These men will want to continue that teamwork right into their business careers. Those who will enter into this industry will,

"The Coin Machines Merry-Go-Round"

without any doubt, demand that this nation's coinmen become a team working to defend themselves against publicity seeking politicos, glory seeking crusaders, circulation seeking newspapers, inequitable taxation, adverse legislation, and all the other evils that can besot this industry.

And this isn't all. Already the creation of many great combines of coinmen of their own volition, pooling all of their interests, and thereby causing to arise unusually large routes, large distributing organizations controlling a large area of the nation, also point a new path of teamwork with the return of normalcy.

From the smallest to the largest of the men on the actual firing line of this industry there is that definite tendency toward greater teamwork to create more certain security. As apparent as it has become today - so much more prominent will it be - tomorrow.

Many an apple cart will be upset, but not by far-seeing, intelligent men. Only by the small minded (what-was-good-enough-for-grandfather-is good-enough-for me) thinker, who only knows his today but does not care to think of his tomorrow - when the consequences of all his acts come due.

The return to normalcy is something for all this industry to consider. Government regulation of industry will not halt completely with the end of the war, sad to state, and regardless of what political party comes into national power. Once such power is granted, it is exceptionally hard to retrieve.

OPA, WPB, SWPC, WMC, and all the many, many numerous others, will fight to remain in existence long after the war is won. Each will have its own reason and its own strong argument for continuing. Yet, like NRA, many will also become only history.

Therefore, in this return to normalcy sometime after the war, this industry should be prepared to completely control and carefully and correctly steer its own course. And the correct course can only be assured by teamwork. In the team of manufacturer, distributor, jobber and operator lies the answer.

Such a team, presenting a powerful and intelligent, nationally united front can gain for this industry the prominence, the glory, the respect and prestige it has so long sought.

40,000 COIN MACHINE SOLDIERS

There are today, scattered over the world's battlegrounds, about 40,000 coin machine soldiers, sailors and marines. 40,000 blue stars brightly gleam in the service flags of this industry thruout the nation.

But what is most important is the fact that these 40,000 members of the armed forces eagerly look forward to the day when they will be able to again return to this industry. Many letters arrive from these men daily to their former employers in this industry all over the nation. They tell how eager and even anxious these men are to come back to this world of coin operated equipment.

This industry therefore has a grand and unusual opportunity before it. It can be the first, the very first industry, to openly and publicly declare that it will take back every single serviceman who will return from those grisly battlegrounds.

It can by such public action, over the radio, in the press and thru magazine coverage, win for itself the sort of acclaim this industry has always wanted and needed, and which will further help to advance the future of this business.

Just as this industry proved itself outstanding where war work was concerned, and numerous Army and Navy "E" flags fly over its factories to attest to this fact, it can once again, by being the very first industry to make such announcement, gain for itself a like prestige and respect which its factories have already won for efficient production.

This past week The Cash Box brought forth the fact that all industry was concerned with the returning soldier and what to do about him. Now an unusual opportunity presents itself for all in this trade to win great acclaim by calling attention to all the nation that this industry will, and is even eager to, again welcome back as many of its 40,000 members who will return from serving the armed forces.

"The Coin Machines Merry-Go-Round"

"THEY'VE LEARNED HOW TO OPERATE"

One of the great lessons of this wartime period is that the nation's coinmen are reported to have learned how to operate. They have learned how to get along with less help, less parts, less supplies, in fact, less of everything and yet not lose efficiency. They have also learned how to concentrate their routes into smaller and more profitable areas. How to avoid the pitfalls that come with taking on locations from all over the territory and which locations, because of their distances, eventually prove anything but profitable.

They have learned how to cultivate and thereby make the best of each location. How to keep storekeepers happy and satisfied with little. How to encourage greater play. How to keep machines going over a long period of time. In short, how to make operating pay-off.

Yet, many claim that the operators have surely learned all these lessons the entrance of the new post-war era will disrupt all these good things. These men are of the belief that operators will once again rush for machines and that the competition created by the avalanche of new equipment, and that as new machines reach out for more and still more locations, they will again have to over buy and that this, in itself, will upset all the good that was learned during this wartime period.

Of course, these expressions are open to much argument, pro and con. The Cash Box does not believe that any operator can over-buy. The Cash Box instead believes that the operator will buy what he needs and as and when he needs it and because of the lessons he has learned during this war - he will make everything he buys pay off better than ever before.

It is true, of course, that the average operator will be faced with keener competition than he has ever before had to contend with. He will have to, whether he likes it or not, make room for other men who are going to invade his territory. Some of these men will be former operators returned from the armed forces and war factories and some will be entirely new blood.

In a letter received from one noted coinman he questions in part, "Will the operator again find himself working for debts he has contracted? Will he wind up with 'wood' and not 'cash'? Will he be in the position to carry on further each month, each year, or will the post-war period spoil what he has now created?"

There is no doubt that the one and only answer which can be given to any such questions as those above is simply that this will depend most entirely upon the intelligence, ability and efforts of each individual operator fitted to the peculiarities of his own particular territory.

There is no doubt also that the average operator realizesnew equipment will help revive a great many of his present locations. Many of these he is hanging on to only because he wants them when the war is over. Some of these are just bringing a very fair average. Yet, with new equipment, there is no doubt that they will skyrocket to new and better take. The operator is today not afraid to buy - he has learned that buying is the backbone of his business for he has learned how to operate.

"BUSINESS INDEX OF THE WEEK"

Once again The Cash Box leads the way with a new feature which has already won fine comment from the nation's coinmen. The "Business Index of the Week" at even a rapid glance, gives a complete picture of collections for the past and present weeks in the four prominent fields of the trade. It tells a quick and pert story. It hits sharply to the point. The average man in this industry, whether he does or does not operate, is interested in how collections are going nationally, not just in his own small area, for in this fashion he gets a better picture of his industry, and can thereby better plan his future course.

Amusement machines, merchandising equipment, music machines and scales and service machines are all covered by separate dual sets of barometers. In this fashion those interested in any special equipment know what the rest of the nation as a whole is doing. It is the best business guide for wholesaler and operator alike.

It is the sincere hope of The Cash Box that its subscribers will continue to cooperate as handsomely as they already have and will return the government postcards after filling them out immediately after they receive each week's issue.

"TALKING OUT LOUD"

INDUSTRY TALKS POST-WAR

FROM COAST TO COAST NATION'S COINMEN ARE DISCUSSING POST-WAR PERIOD — HOPE FOR NEW AND REVOLUTIONARY DEVELOPMENTS IN ALL DIVISIONS OF THE INDUSTRY

CHICAGO—It takes but a two or three day visit to this city, rightfully called "America's Coincenter", to become convinced that all the industry is talking post-war. From all over the nation operators, jobbers and distributors are flocking here to talk with manufacturers and remain to gain greater optimism than ever before for this business.

A week spent in Chicago at this time is not going to prove productive of any true results regarding the post-war equipment, men who have visited here report. The factories continue on their busy way producing the materials of war which they have been manufacturing for sometime. But this is not holding back men from California, Colorado, Florida, New York, New Jersey, Michigan and from almost everyone of the 48 states of the union popping into town each and every week.

Automatic merchandise machine men are especially excited about post-war prospects. They are sincere in their statements and in their belief that this division of the industry will lead the way in the post-war era. Most of these men seek something entirely new and dependable in beverage dispensers. They claim that the surface hasn't even seen a scratch in this field and that beverage vending will be one of the leading fields after the war is won. They also seek larger, multiple merchandisers that will be able to make change and vend three and maybe more products at once. They also eagerly look forward to great and revolutionary advances in the smaller merchandisers.

Music men are the most outspoken in their belief that their division of the field is already assured the retention of its leadership when the post-war manufacturing era starts. They claim that the backlog of orders for their field to be the largest in the history of this business. They also state that they believe the average manufacturer will produce his last known model but with improvements learned during this wartime period. They state that some are already considering making one model of two or three former machines which proved most popular and profitable these war years.

Most eager of all visitors for new equipment are the amusement games men. They make it their business to cover each and everyone of the former amusement machines manufacturers and listen eagerly for news of what new and different products they can expect. Rumors fly about in this division of the field with such rapidity and regularity that the visitor here is at first confused. Naturally, all have a pet story to tell. Certain distributors have made this even harder to bear by returning to their hotels during the evening and on meeting with other visiting coinmen whisper exultantly that their factories will have "the greatest, most outstanding, terrific, money-maker of all time."

Most outstanding, of course, is the fact that the industry has gone all out expecting to see the great dawn of a grand tomorrow. This city's leaders are greeting more and still more visitors daily and prophecy, conjecture, rumor, and truth, too, fly about in a confused cloud.

MARTIN SHIREY HAS NEW COMISH PLAN

LEWISTON, PA.—Martin Shirey, noted coinman of this city, offers the trade the following suggestion for a new commission basis.

"In reading the article in The Cash Box, August 15, 1944, you say something about a commission basis of 70-30%.

"Here is my idea and thought I would pass it on to you. Maybe I'm wrong.

"We, as operators, are always up against the customer who wants the latest equipment and highest commission regardless of the take.

"I have figured out all ways and here is the one way that I decided to try out.

"Take $1 per week per $100 invested in the locations as depreciation of equipment and in case location keeps equipment the second year the depreciation, or take out for each week, would be cut in half, or 50c per week of original investment on each $100. Then balance 50-50%.

"Now here is how it works out with the location who keeps a 3 year old machine valued at $300. It would be $3 out and then 50-50. The man who demands a new machine at $600 and 10 wall boxes at $40 each or $1,000 the set-up would be $10 out and then 50-50%."

FRED McCLELLAN SET FOR POST-WAR MFR.

SACRAMENTO, CAL. — Fred C. McClellan of General Products Company, this city, who clicked with the trade on his many conversions, reports that the firm are going ahead manufacturing these at top speed to meet present orders.

Fred states, "We intend to bring out something exceptionally good for this industry immediately after the war. We will have a Chicago office, which we are arranging for at this time, and all shipments to the east will be made from this central point to save freight expense.

"It won't be long before the war will be over and I'll be back in Chicago and New York making arrangements for materials, supplies, etc."

EUGENE SEBRING PRAISED FOR ARTICLE

CHICAGO—Eugene Sebring, 14 year old son of Al Sebring, Bell Products Co., this city, has won much praise for an article written at Senn Highschool in this city. The article is entitled, "America's Need For Tolerance Among Her Citizens". The article follows:

"Today, more than ever before, the word tolerance means so much. The word tolerance should be in the mind of people of all religions. After the World War I, the United States adopted people of many different religions and expected them to live as brothers. The reason for people fighting between themselves, is, that they do not understand each other and that is the very thing tolerance means—understanding. The Declaration of the Rights of Man laid down a principle that no citizen should be disturbed in the peaceful pursuit of his ways on account of his opinion or his religious ideas.

"Today our men are fighting for that very word, because if all the world is tolerant there will be a much better understanding between all people regardless of race, color or creed. There will be no racial problems and then men will really be created equal. It will always remain true that the principle of religious liberty as it affects both individuals and associated groups, has in general, resisted not only the clericalism which has cropped up in the post-war policies of many countries, but, the advent of dictatorial governments which have wickedly destroyed the foundations of modern liberty and constitutionalism.

"Intolerance must be banished, and the only way this great task can be accomplished is for parents to educate their children against intolerance; for schools to campaign against intolerance; churches could be very helpful; movies and newspapers could and should educate ignorant parents to educate their children against intolerance. The word intolerance is against liberalism and constitutionalism, and since we are a democracy, all our people should learn to be tolerant, to be good citizens, and to live as brothers of a free country.

"This is my opinion of America's Need for Tolerance among her citizens, and how important it is to be against that evil word of intolerance."

WANTS LOCATION CONTRACTS NOW

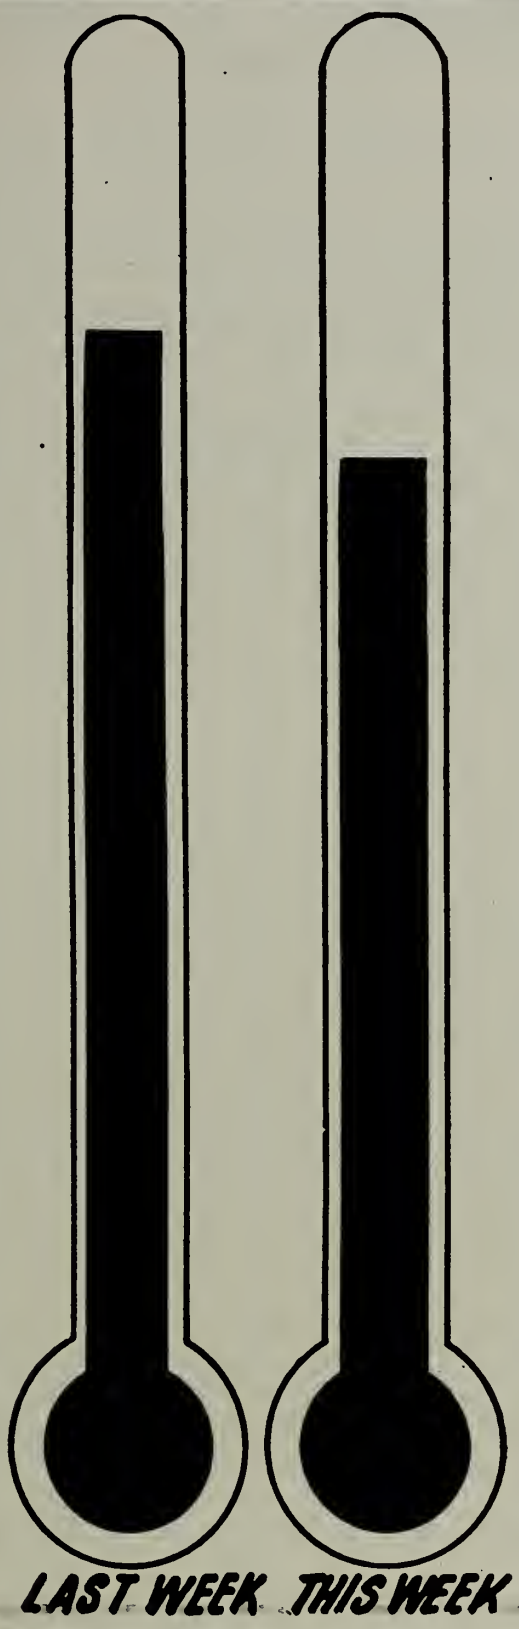
PARIS, TENN. — Jourd White, Jourd White Sales Co., this city, believes that coinmen should protect themselves for post-war with a contract legally binding locations immediately. He writes:

"Do you have in your files an agreement that operators might use in signing up his locations for Post War Equipment? Also binding locations in legality, still hold the good will & prestige with the locations that we have built over a period of fifteen years of successful selling & operating.

"If there was such a contract it would put the Pre War operator in a much better position to analyze his future needs & meet them in a more business and economical manner."

BUSINESS INDEX OF THE WEEK

A 1944 Copyrighted Feature of: The Cash Box, 381 Fourth Avenue, New York (16)



The collections barometer this week again indicates a definite downward trend. Some few territories scattered thruout the nation, report slight increase in take. These show averages from 3% to as high as 12%. But the downward revision in collections of all types of equipment continues and in some cases the drop for this past week is reported from 30% to 40%. On the average, tho, collections on all types of equipment thruout the country indicates a drop of 15% this past week.

Most noticeable is the fact that music, on the average, does not show as severe a drop as do most of the divisions of the amusement field. With the exception of slots; the pin games, one-balls, consoles, arcade machines, etc., show a definite decline this past week. In some individual cases the average drop in collections is very severe.

Some merchandise machine men report drops of 20% and more in collections this past week but the average report in this field is that machines are continuing along steadily selling whatever merchandise is obtainable and that the seasonal drop of about 20% average in collections is holding at this point. The beverage dispenser men give most optimistic report in the merchandiser field, most reporting ups in take.

Scales and service machines of all kinds maintain a steady average with the average 20% seasonal drop remaining in force. This drop, these men report, started at the beginning of the summer and is holding. No severe drops were indicated in this field this past week.

Most of the downward collection trend this past week is again attributed to the extreme sultry weather thruout the nation and also to the lack of beer and liquors in the bars and taverns.

Resort spots, in most cases, show better take than expected. Continuing heat is reported driving public to these places and play steps up in evenings.

THE CONFIDENTIAL PRICE LISTS

AN EXCLUSIVE MERCHANDISING SERVICE FOR THE COIN MACHINES INDUSTRY ISSUED EVERY OTHER WEEK BY: THE CASH BOX, 381 FOURTH AVENUE, NEW YORK 16, N. Y.

FOREWORD

Many times, wide differences appear in the high and low prices of certain equipment. Like any true reporter The Confidential Price Lists can only feature the market prices as they are quoted. The Confidential Price Lists act exactly the same as the market quotation board at the Stock Exchange—posting the prices exactly as they are quoted for the past two weeks, regardless of how much they may seem to be out of line. Some machine prices do not change for months. The Confidential Price Lists, rather than show no price, retain the last known quotations for such equipment so that the subscriber at least has the last known quoted prices as a basis to work with. Prices continue to be very widely divergent these days. Someone on the West Coast may feel a certain machine worth $150.00 whereas someone on the East Coast may think it worth but $75.00. Of course, condition, serial, appearance, demand, territory, quantity, etc., must all be taken into consideration. The Confidential Price Lists report each quotation exactly as it is made and depend on the subscriber to make average price adjustment to fit the peculiarities of his own territory.

METHOD

The Confidential Price Lists are to be read as follows: First price listed is lowest price for the week; Second price listed is highest price for the two week period: Where only one price appears this should be considered lowest price.

CODE

CHECK THIS CODE CAREFULLY. BECOME ACQUAINTED WITH EACH ONE OF THE CODE NUMBERS AND WHAT THEY SIGNIFY. THESE CODE NUMBERS APPEAR IN FRONT OF THE NAME OF EACH MACHINE.

1. MEANS PRICE WENT UP.
2. MEANS PRICE WENT DOWN.

WPB MEETS WITH JOINT MDSE AND MUSIC MFRS. COMMITTEES

WASHINGTON, D.C., AUGUST 21 - Instead of just the music machine manufacturers meeting with WPB (War Production Board), a combination of the music and merchandise machine trades met with this important government agency today. The effect was to bring these men out of this joint meeting room feeling highly optimistic.

It is understood that the music machine manufacturers' committee will officially be known as the Commercial Automatic Phonograph Industrial Advisory Committee and will be composed of the following:

C. T. McKelvey, J. P. Seeburg Corp., Chicago, Ill.
David C. Rockola, Rock-Ola Mfg. Corp., Chicago, Ill.
V. G. Wahlberg, Mills Industries, Inc., Chicago, Ill.
E. Reulmann, A.M.I., Chicago, Ill.
James E. Broyles, The Rudolph Wurlitzer Co., N. Tonawanda, N.Y.

The merchandise machine manufacturers will officially be known as the Merchandise Vending Machine Industry Advisory Committee. This committee is composed of the following:

R. Z. Greene, Rowe Mfg. Co., Inc., Belleville, N.J.
Chas. Shaw, Advance Machine Co., Chicago, Ill.
Frank Vogel, Columbus Vending Machine Co., Columbus, O.
Clarence Adelberg, The Stoner Corp., Aurora, Ill.
W. E. Bolen, The Northwestern Corp., Morris, Ill.

It is generally hoped among the trade that these two groups of manufacturers will concur in their thoughts and that they will arrange to comply with WPB in all the various matters which have to do with winning the war first. After that, it is expected that they will go all out in bringing to this industry the greatest machines which they have yet presented in their history.

These manufacturers, as the industry will note, are among the nation's most outstanding. At the same time it is a general surprise to the field that these two groups were put into the same meeting room, each with its own purpose, at one and the same time.

The belief was that separate meetings would occur. The fact that both of these groups of manufacturers did meet with WPB at one and the same time shows that there is a definite distinction made between the gaming, music and merchandising fields.

Regardless of this fact, this industry is in the hope that these two groups will yet meet with the games division, the WPB industry advisory committee known as, The Coin Operated Amusement, Gaming and Arcade Industry Advisory Committee, which met with WPB on August 16 (five days before this dual group met with WPB) and that some common ground will be found whereby all these committees will be able to form one general committee to benefit this industry as a solid and single unit and as a united front.

At least, according to all reports, this is the hope of the smallest and some of the largest men comprising this industry. They believe that the men who have arranged for these meetings should not be allowed to meet individually as separate divisions of this industry, but rather as a single entity which will thereby win great respect as a unit.
